Research interests

I am interested in probabilistic machine learning and decision-making under uncertainty using principled decision theory. Many such problems exist in active learning and in general sample-efficient experimental design, including Bayesian optimization, multi-armed bandits, and active search. I develop budget-aware decision-making algorithms that approximate optimal decisions in a nonmyopic manner. My current work focuses on developing more expressive measures of uncertainty in experimental design.

Education

- 2019 – 2024 **Ph.D. in Computer Science**
Washington University in St. Louis, St. Louis, MO
Dissertation: *Experimental Design for Scientific Discovery* (Turner Ph.D. Dissertation Award)
Advisor: Roman Garnett
- 2015 – 2019 **B.A. in Computer Science and Mathematics**
DePauw University, Greencastle, IN
summa cum laude with highest honors, minor in Philosophy
Advisors: Khadija Stewart, Zhixin Wu, and Ashley Puzzo

Work experiences (selected)

- Aug 2026 to **Assistant Professor** Fulbright University Vietnam
present Department of Computer Science
I teach core computer science courses and advanced topics on probabilistic machine learning and sequential decision-making. My research targets experimental design techniques such as Bayesian optimization, active search, and nonmyopic decision-making for scientific discovery.
- Aug 2024 to **Postdoctoral Research Associate** Princeton University
May 2026 Department of Computer Science
We develop active learning and experimental design algorithms to aid the process of making scientific discoveries. Our focus lies in finding new methods of quantifying uncertainty in machine learning models, leading to more efficient ways to guide the design of experiments.
- Mar 2023 to **Student Researcher** Google LLC
Aug 2023 Google Research
We design sample-efficient optimization algorithms to calibrate large-scale traffic simulators to match real-life data, leveraging Bayesian optimization techniques. Our approach centers around incorporating prior knowledge into the predictive models that guide decision making.

Awards & honors

2025	Turner Ph.D. Dissertation Award, Washington University in St. Louis
2024	TRIADS Lightning Talk Award, Washington University in St. Louis
2021 & 2022	Honors Distinction for Outstanding Ph.D. Students, Washington University in St. Louis
2019	Robert J. Thomas Outstanding Senior Award, DePauw University
2019	David Becker Fellow, Information Technology Associates Program, DePauw University
2019	Outstanding Chapter President, DePauw University
2017 – 2019	Perennial Scholarship Recipient, Sigma Nu National Fraternity
2015 – 2019	Science Research Fellow, DePauw University
2019	Phi Beta Kappa, DePauw University
2018	Youngest Published Book Author, Packt Publishing
2018	Wylie Condit Scholarship Recipient, Computer Science Department, DePauw University
2018	Wylie Condit Scholarship Recipient, Mathematics Department, DePauw University
2016	First Place, Michigan Autumn Take-Home (MATH) Mathematics Challenge
2015	Silver Medal, Vietnamese National Mathematical Olympiad

Talks

Decision making under uncertainty: A Hands-on Guide to Bayesian Decision Theory. Conference talk at *PyData Global*, 2025.

Machine learning-aided search for discovery. Invited talk at the Institute for Data Driven Dynamical Design meeting, 2025.

Cost-effective data annotation with Bayesian experimental design. Conference talk at *PyData Global*, 2024.

Making your experiments count with Bayesian experimental design. TRIADS lightning talk, 2024.

Diversity-Aware Active Learning for Scientific Discovery. Tutorial at the Institute for Data Driven Dynamical Design meeting, 2024.

Gaussian Processes for Machine Learning. Invited talk at the Data Science School, University of Lagos, 2024.

“But what is a Gaussian process? Regression while knowing how certain you are.” Conference talk at *PyData Global*, 2023.

Bayesian Optimization: Fundamentals, Implementation, and Practice. Conference talk at *PyData Global*, 2022.

Local Bayesian Optimization via Maximizing Probability of Descent. Invited talk at the *Information Theory Workshop (ITW)*’s special session on Black-Box Optimization, 2022.

Active Preference Learning and Optimization Under Uncertainty. Conference talk at *PyData Global*, 2021.

Nonmyopic Bayesian Optimization. Ph.D. qualification exam at *Washington University in St. Louis*, 2021.

Bayesian Machine Learning: A PyMC-Centric Introduction. Conference talk at *PyMCon*, 2020.

Teaching

Fall 2023	Instructor, <i>Introduction to Machine Learning</i> , Washington University in St. Louis
Spring 2023	Guest lecturer, <i>Introduction to Machine Learning</i> , Washington University in St. Louis
Spring 2022	Assistant in instruction, <i>Machine Learning</i> , Washington University in St. Louis
Fall 2019	Online instructor, <i>Deep Learning with Google Colab</i> , Udemy
Spring 2019	Online instructor, <i>Python Security</i> , EC-Council

Services

2026	Co-organizer, Visual Analytics in the Era of Autonomous Science IEEE VIS Workshop
2025 – 2026	Workflow Chair, International Conference on Automated Machine Learning
2024	Website Chair, International Conference on Automated Machine Learning
2024	Volunteer Lecturer for Machine Learning, Statistics Without Borders
2021	Student Leadership Council, Harnessing the Data Revolution (HDR) Research Grant
2020	Chair of the Program Committee, PyMCon
2020 – 2021	Liberman Graduate Advisory Committee, Washington University in St. Louis
2019 – 2020	Graduate Student Association Member, Washington University in St. Louis
2017 – 2019	Writer for the Python Software Foundation (PSF)
2018 – 2019	President of the DePauw Data Science Group (DPUDS), DePauw University

Peer-reviewing

2021 – 2026	Neural Information Processing Systems (NeurIPS)
2023 – 2025	International Conference on Automated Machine Learning (AutoML)
2022 – 2026	International Conference on Artificial Intelligence and Statistics (AISTATS)
2022 – 2026	International Conference on Machine Learning (ICML)
2023 & 2024	Journal of Machine Learning Research
